(54) AUTOMATIC AUCTION PROCESSING SYSTEM

(57) Abstract:

PURPOSE: To put a contract price in a proper price range as reasonable as possible by suppressing a rise in price by radical bidder.

CONSTITUTION: If the price exceeds a proper price greatly and is not proper in the process of a rise in price by a price raising means 50C, an auctioneer operates a forcible price stopping means 50G at proper time to forcibly stop the rise in price during the rise in price. Consequently, a transaction display means 50H displays various transactions such as a contracting transaction that the auctioneer performs at auction process display parts 67 and 69. In this state, when the auctioneer operates a transaction selecting means 50I to select said contracting transaction and a purchaser who is stored in a purchaser storage means 50E and sends a price bidding signal at the point of time of the forcible stop of the price is displayed at the purchaser display part 75 of a display board D.

LEGAL STATUS

[Date of request for examination] 04.04.1996

[Date of sending the examiner's decision of rejection] 30.09.1997

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal] against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
